

Supporting Development with Information

CAP has established a Soochna Sansadhan Kendra in Kuchpura. It is designed as a multi purpose center for livelihood work and awareness creation. Awareness material on sanitation, health, hygiene and livelihoods has been kept in the center for local residents. It also has community maps, heritage walk maps and souvenirs for tourists who take the MHW.

It was recently moved to a more central location in the community courtyard to increase its accessibility by the community as well as tourists. Community women have decorated the centre with traditional wall motifs and colours.
